

**FMUSER FUQ-SMS System Subscriber Management Platform Million-Level Capacity
CAS Integration SMS-Based Mobile Charging Digital Headend Broadcast Operations**
Product Overview

The FMUSER FUQ-SMS System is a scalable subscriber management platform supporting million-level users with CAS-compatible interfaces. It processes entitlement data via batch distribution and enables SMS-based mobile charging. The system adopts modular C/S architecture for flexible deployment across IP networks. Ideal for digital TV operators requiring high-capacity user management and pay-per-view service providers needing multi-payment integration.

Solution Guide

Key feature

API integration with SMS gateways and billing systems
