
**FMUSER FUQ-1000 USB-IR Control Cable 10 Remote Keys IR Learning Modes STB
Signal Stabilization Headend System Accessory**

Question:

I want my STB to fix on Channel XXX whenever it powers on or reboots. What can I do?

Answer:

Channel Locker:

It is a simple cable with USB port and IR. Insert it in STB, set the channel you need it with remote control. All is OK then.

Product Overview

The FMUSER Channel Locker is a 45cm USB-to-infrared probe cable designed to stabilize headend systems with multiple STBs. It learns and emulates up to 10 remote control keys to maintain uninterrupted signal flow during disruptions. Features 5 adjustable IR learning modes for compatibility with various STB response speeds. Ideal for broadcast facilities and cable operators requiring fail-safe STB control during power outages or system reboots.

Key feature

Ensures signal continuity during unplanned STB reboots or power failures
