

FMUSER FUQ-2044TL EPG System DVB-Compliant 2044 TS Streams ASI-IP Output PSI-SI Tables Generation 64-Day EIT Scheduling Digital TV Broadcasting Product Overview

The FMUSER FUQ-2044TL EPG System delivers DVB-standard program guide data with PSI/SI tables generation. It processes up to 2,044 transport streams via ASI/IP outputs, managing 65,530 programs with 64-day EIT scheduling. This 1RU rack-mount device operates through client/server software on Windows/Linux. Ideal for cable headends and terrestrial broadcasters requiring compliant EPG distribution.

Solution Guide

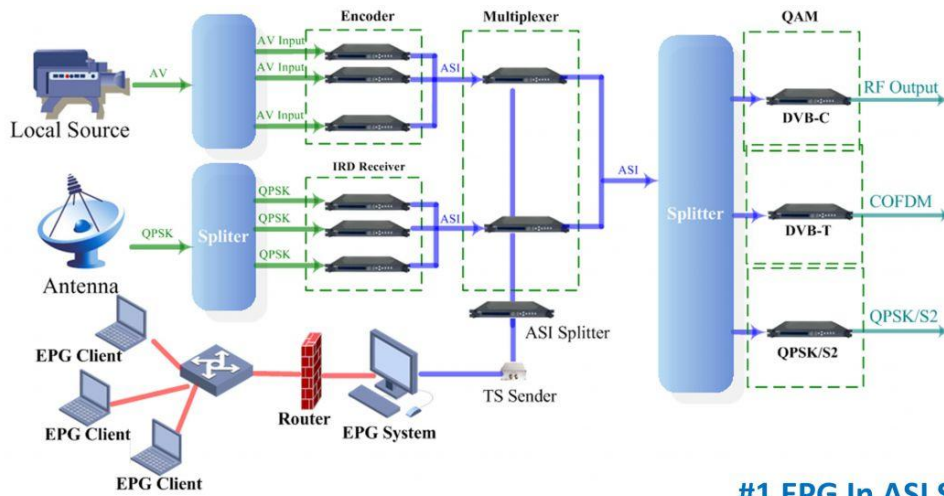

Key Feather

- Support ASI and IP Output Solution
- C/S System mode
- Support maximum 2044 TS stream
- Support maximum 65530 Program
- Support maximum 64 days EIT event
- Friendly user interface
- Self-define events formats Support

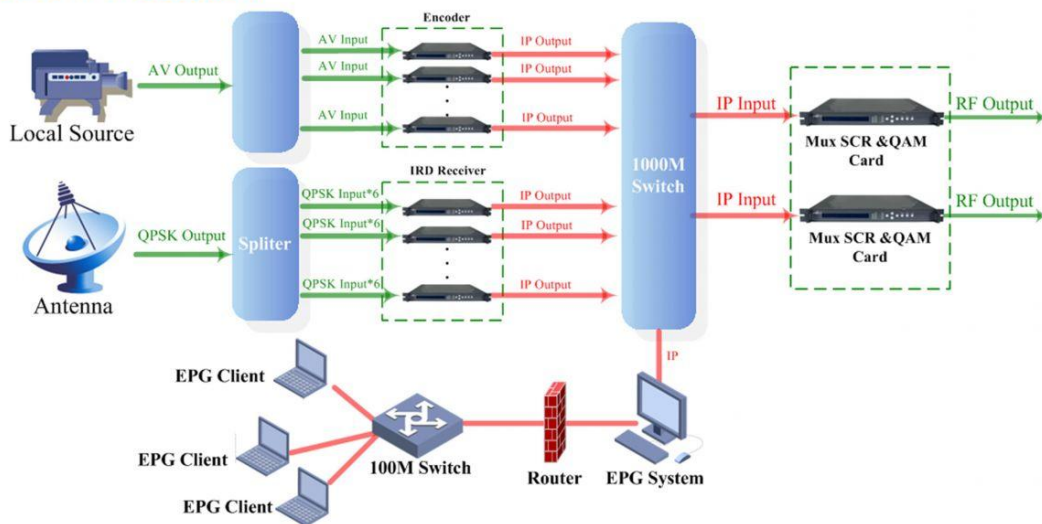

Total support DVB Standards

How to use it ?

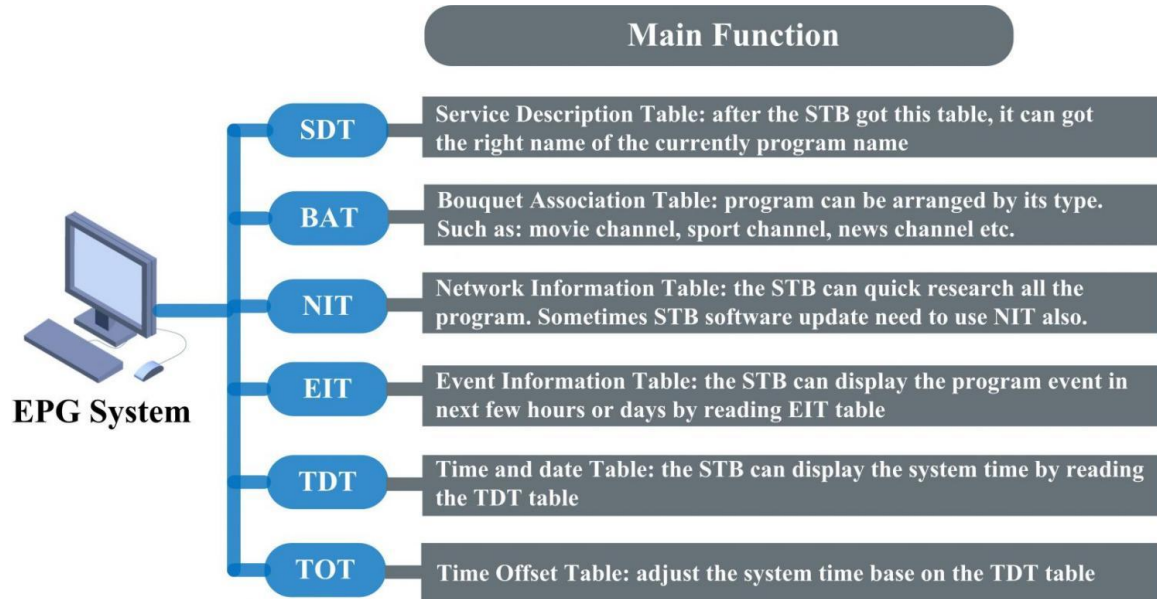

#1 EPG In ASI Solution

#2 EPG In IP Solution

EGP Function Explain

Specification

Hardware Requirement

EPG Server Configuration

CPU:	2.5GHz and above (recommended)
Memory:	4 GB and above
Hard disk:	the free space is 20 GB and above
Network card:	1GB Network Card 100 Network Card (optional)

ASI Function

TS Sender	 For ASI Solution(optional)
-----------	--

Software Requirement

Function Software:	EPG Software
Database:	SQL Server 2005、SQL Server 2008
Operation System:	Windows server 2003、windows server 2008

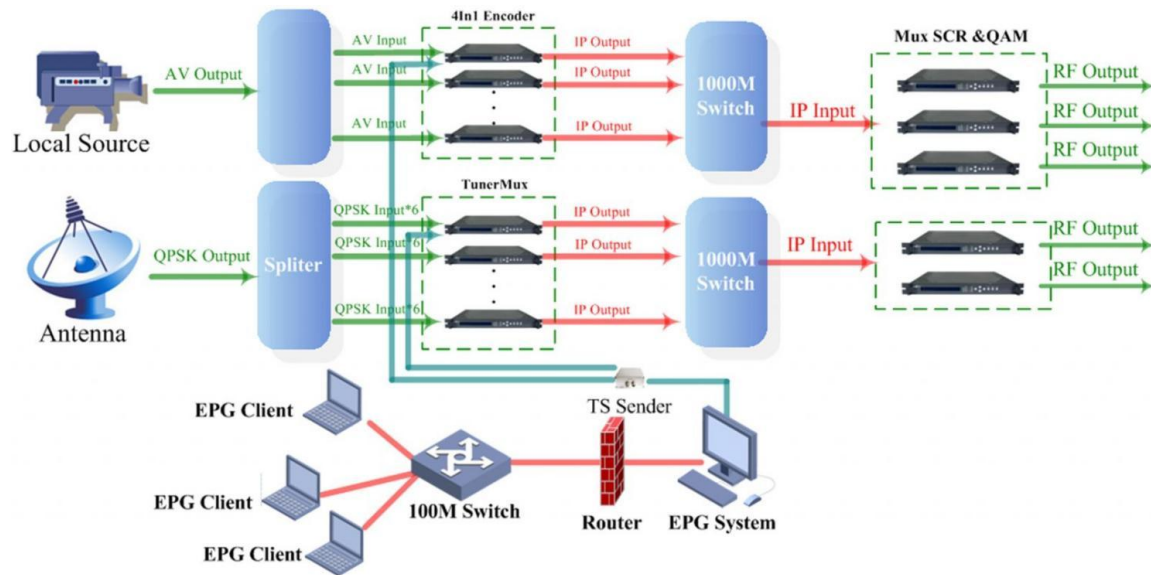

Please note: For ASI Solution, the operation system needs 32bit

EPG Client Configuration

CPU:	2.0GHz and above (recommended)
Memory:	2 GB and above
Hard disk:	the free space is 2 GB and above
Network card:	1GB Network Card

Function Software:	EPG Client Software
Database:	SQL Server 2005、SQL Server 2008
Operation System:	Windows XP (SP3 Above)、Windows7 Windows Vista

More Example

Due to the switch bitrate limitation The two switch can not link together. So we need use the ASI solution, first give all the EPG table to Encoder and Tmux, then IP multicast output give to MuxScrQam Card
