

FMUSER FUQ-204B Capture Card 4x3G-SDI Level A-B Inputs 6x Bi-Directional ASI Ports PCIe3 x4 Interface SMPTE 424M DVB-ASI Standards Low Latency DMA Live Broadcast Production

Product overview

The FMUSER FUQ-204B is a professional capture card with 4x3G-SDI inputs and 6 bi-directional ASI ports. It captures uncompressed SDI and compressed TS video, outputting via PCIe. Supported by free Linux drivers for OS $\geq 4.x/5.x$, it enables easy integration. Ideal for software encoding, live production, and broadcast monitoring.

Key feature

Supports 4x3G-SDI Inputs configurable in Level A or B mode.

Features 6 bi-directional ASI Ports for flexible transport stream handling.

Enables API Access for direct control of video and audio streams.

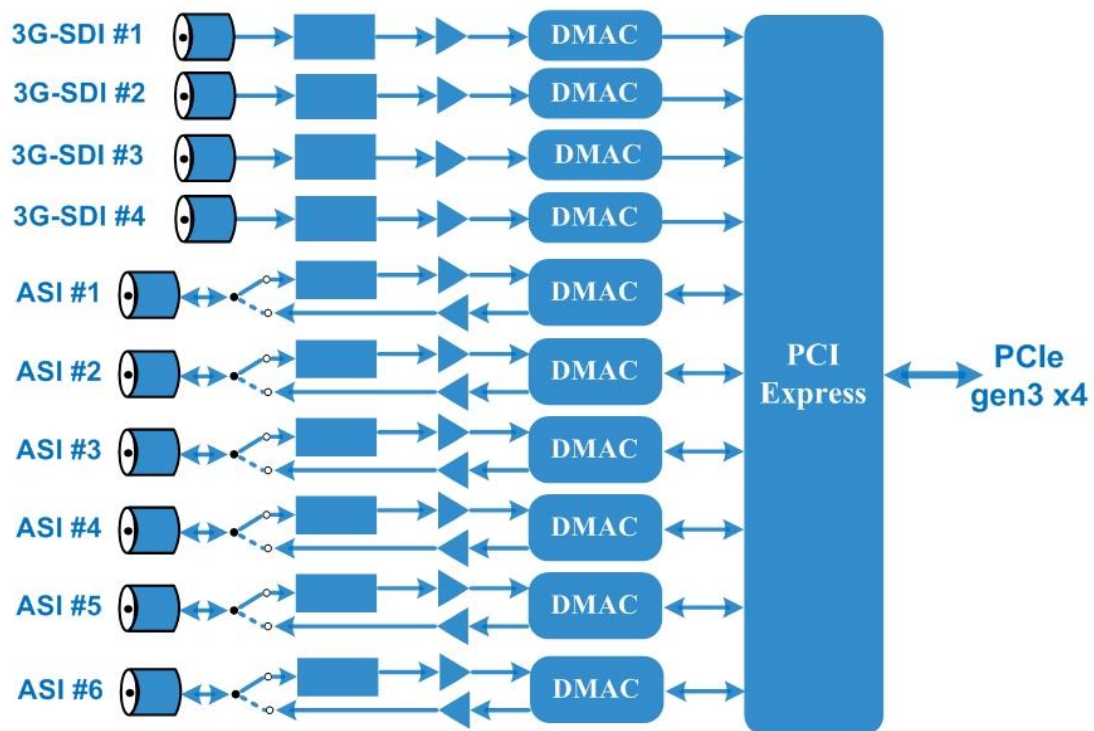

Utilizes Low Latency DMA for efficient data transfer.

Includes Free Linux Drivers supporting OS $\geq 4.x/5.x$.

Applications

- * Software encoder with 3G-SDI interface
- * Live production mixer, effects generator
- * SDI monitoring, recorder; ASI monitoring, recorder, broadcast
