

FMUSER FUQ-4213J EIT Multiplexer 512 SPTS-MPTS Input-Output UDP-RTP IP TS CA PID PSI-SI Editing Web-Based Broadcast Telecom Headend

Product overview

The FUQ-4213K EIT Multiplexer is a modular head-end device for IP TS conversion, featuring a 1U chassis that supports up to 3 independent cards. Each card processes 512 SPTS or MPTS inputs to 512 SPTS outputs, with CA filter and PSI/SI editing for stream management. It includes web-based configuration and monitoring, ideal for broadcast systems requiring secure and compliant operations.

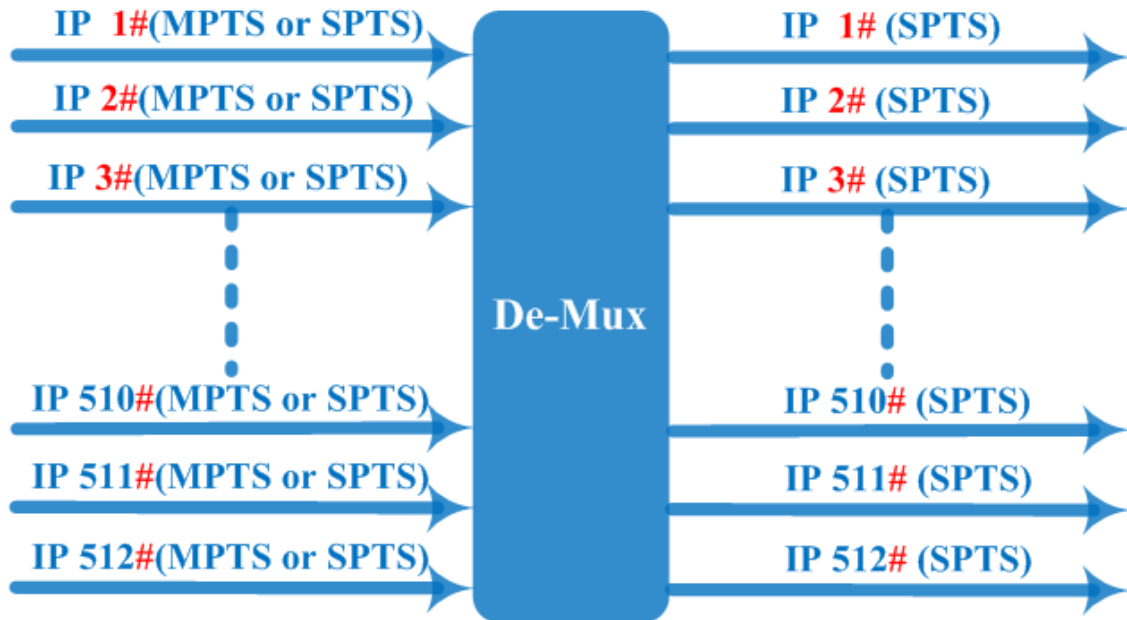

Key feature

Enables web-based operation for configuration and monitoring via intuitive interface.

Specifications

Input	512 SPTS or MPTS IP input over UDP, RTP, Unicast and Multicast (per card)	512 SPTS or MPTS IP input over UDP, RTP, Unicast and Multicast (per card)
Output	512 SPTS IP output UDP, RTP, Unicast and Multicast (per card)	512 SPTS IP output UDP, RTP, Unicast and Multicast (per card)
Multiplexing	Support CA PID filtering, PID re-mapping	Support CA PID filtering, PID re-mapping
Multiplexing	Support accurate PCR adjusting	Support accurate PCR adjusting
Multiplexing	Support PSI/SI rebuilding and editing	Support PSI/SI rebuilding and editing
General	Dimension(WxLxH)	482mm×410mm×44mm
General	Weight	3.6kg
General	Temperature	0~45℃(working) -20~80℃(storage)
General	Power supply	100~240VAC 50/60Hz
General	consumption	20W

Working Principle (per daughter card)

About Us

FMUSER is a company specializing in broadcasting and television transmission systems and integrating hotel IPTV systems. The company was established in 2009 and has served over 180 countries worldwide. More than 20,000 television stations, radio stations, and hotel clients from different.
